

## NATURE

It is a complex salt of aluminium with a high solubility in water.

## TECHNICAL DATA (average values)

---

Aspect	Solid
Colour	White
Density at 20°C (g/l)	600
pH (10% in water at 20°C)	approx. 3,4
Chemical composition (%):	
Al as Al <sub>2</sub> O <sub>3</sub>	29,0
Na as Na <sub>2</sub> O	< 1

---

## PROPERTIES

- Easy handling.
- Environmentally safe.
- Easily soluble in water at room temperature.
- Long stability during storage.

## FIELDS OF APPLICATION

- **WASTE TREATMENT.** Its water solutions can be used in waste water clarification, drinking water,...
- **CONSTRUCTION.** It and its water solutions can be used as accelerator for easily set in cement and concrete preparation.

## STORAGE

AKF-325 AT must be stored, in a dry place, in original tightly closed bags. It can absorb humidity from the atmosphere.

## SAFETY CLASSIFICATION FOR STORAGE AND TRANSPORT

It is not classified as dangerous material according to EEC Directives on "Classification, packaging and labelling of dangerous substances".

## PACKAGING

Bags, big-bags and silo truck.
