IBERSIL® A-400
Anticaking / fluidizing agent and carrier of active substances

NATURE AND ASPECT
White powder of amorphous precipitated silica, SiO₂.

PROPERTIES
- Homogeneous particle size with a very narrow distribution.
- Excellent fluidizing / anticaking power.
- Very high absorption capacity.
IBERSIL® A-400

■ APPLICATION FIELDS
• Feed and food sector, as an anticaking / fluidizing agent, carrier of active substances.
• Agriculture, as a grinding aid, a humidity retainer, a carrier for active substances and anticaking / fluidizing agent.
• Paper industry and inks, as an absorbent filler.
• Chemical industry, as an anticaking / fluidizing agent, a defoamer…

■ APPLICABLE LEGISLATION
• It is not classified as a dangerous substance according to Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures.
• It fulfils the Regulation (EC) No 1333/2008 and No 1831/2003 on food additives and on additives for use in animal nutrition respectively, having the E-551 code as a food additive and the E-551a as a feed additive. It fulfils the criteria in Commission Regulation (EU) No 231/2012 laying down specifications for food additives, as well as in Directive 2002/32/EC and further modifications on undesirable substances in animal feed.
• It is registered according to Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

■ STORAGE AND HANDLING
Store in a dry place. It is recommended to use it before 24 months after the manufacturing date.
Suitable precautions must be taken when handling, following the indication given by the Material Safety Data Sheet (MSDS).

■ PACKAGING
• Multi-layer paper sacks.
• It can be supplied in other formats according to customer requirements.
